Understanding Research with Children and Young People

Edited by Alison Clark, Rosie Flewitt, Martyn Hammersley and Martin Robb all at The Open University

‘There is no single or right way to do childhood and youth research, but this useful book provides readers with essential insight into many of the options, shedding light on the various purposes, practicalities, merits and ethical considerations. It is a great starting point for anyone wanting to do research that is respectful of children and young people.’
– Melanie Nind, Professor of Education, University of Southampton

This book helps you to understand how research is designed and carried out to explore questions about the lives of children and young people. It tackles the methodological, practical and ethical challenges involved, and features examples of actual research that illustrate:

- Different strategies for carrying out research
- Common challenges that arise in the research process
- Varying modes of engagement that researchers can adopt with participants and audiences; and
- The impact that research can have on future studies, policy and practice.
